

Jugendwerkstatt Felsberg at a glance

Briefly

Our work aims to empower people to their sustainable integration into the labour market, to their lasting participation from society. They should be able to live a self-determined, gender equitable and resource-saving lifestyle.

How do we succeed?

The training we provide considers the requirements of the labour market, the contracting bodies, the needs of the participants and the economic assignment of means.

To reach our goals we provide

- Counselling, training and coaching: pro active social work for young people aged from 12 to 25 years, consulting of trainees and their apprenticing companies to prevent drop-outs from vocational education and training (VET).
- Professional orientation and support for the transition from school into vocational education: discovery classes in our workshops; hands-on STEM-education for 7th- and 8th- graders 90min/week at their schools in afternoon-classes
- integrated learning and production as a vocational preparation for VET: classes striving to catch up for junior high school diploma (one mixed class, one class for migrants only); production school with four producing branches (professional cooking, carpentry, media design, metal construction) which produce different goods to be sold on christmas markets and similar public events; 3 internships for 4 weeks each to find orientation and to initiate a VET.
- Vocational training, vocational retraining, standardized equivalency diploma in both the fields of household management and metal works.
- Activation and integration into VET or work: internships in Italy or Poland for longterm unemployed people with a follow-up phase which consists of placement into the regional labour market.
- Counselling and qualification for climate protection: energy related advisory service for real estate in private hands; training of migrants to become climate ambassadors

What we need to succeed

All our employees are committed to our aims and the principles of an organization organized in a grass-roots democracy.

The basis for the success of our work is a high level of qualifications, team- and cooperation skills, flexibility, creativity, commitment to perform and to take responsibility as well as giving the maximum of a job security.
