

Excursion (Tour B) - Monday, 9 Sept 2024 – Pre-conference tour

GUIDED TOUR TO THE LABS OF THE INSTITUTE FOR GLASS AND RAW MATERIAL TECHNOLOGY (IGR) Göttingen

We welcome you to a tour on the material “Glass”, regarding the quality assurances of glasses, SiO₂ materials and other resource components. The 2-hours excursion goes to the Institute for Glass and Raw Materials (IGR) in Göttingen run by Dirk Diederich. Materials tested in this institute derive from the glass industry and production companies for raw materials. The glasses are qualified after DIN standards by modern analytical methods (CT, mass spectrometry, SEM). The quality assurances during and after the production follow strong accreditation rules leading to a tested and qualified resource material and to uniform high-end products of SiO₂ materials.

The timetable for the excursion:

13:45	Meeting at the Geoscience Center Göttingen (GZG), Goldschmidtstr. 1/3, 37077 Göttingen (Venue of QUARTZ-2024)
14:00	On-time departure by bus
14.15	Arrival at the Institute for Glass and Raw Material Technology (IGR) Göttingen
14.15	Welcome and introduction by Dirk Diederich
15.15	Guided tour through the institute
15.45	Departure to the GZG Göttingen
16.00	Expected arrival at the GZG

Best wishes
