

B08 - Species list of Oribatida, Collembola, Mesostigmata and Araneae found in Bukit Duabelas National Park

Data collected with Kempson heat extractors in a framework of CRC990 – EFForTS project B08.

Collection year – 2013, collector – Dr. Bernhard Klärner, University of Goettingen, Germany. Many species are presented as morphospecies; identifications and descriptions of new species are in process.
